AV Storage, Refined: Meet the New Refinio Credenza by Peerless-AV®

Designed for today's professional spaces, the latest addition to the Refinio family combines sleek styling with secure, accessible and efficient AV equipment storage

AURORA, IL – November 17, 2026 – Global AV technology pioneer Peerless-AV® announces the expansion of its Refinio product range with the addition of two new on-wall Credenza AV equipment storage solutions.

The Refinio Credenza is designed to meet the needs of modern AV environments where a stylish, accessible storage solution is required for associated devices and rack-mounted equipment. Its contemporary aesthetic makes it particularly well suited to corporate, meeting room and conference environments where mounting equipment behind a display or running extended cables to a server room is not possible or desirable.

Discreet, Flexible Storage

The low-profile, discreet cabinet provides a slim, wall-mounted installation that combines secure equipment storage, efficient cable management and convenient access. Available in two practical sizes, supporting 2RU and 4RU of 19" rack-mounted equipment, the Credenza offers a solution to suit a wide range of AV requirements.

Adaptable Configuration for Future Upgrades

The included universal mounting surface, together with a comprehensive range of optional accessories and mounting trays, allows the Credenza to accommodate a wide variety of modern AV equipment configurations. The flexible internal design also makes it easy to modify, change or upgrade the equipment layout in the future.

Sleek Aesthetic with Convenient Access

Its clean appearance is enhanced by an attractive acoustic felt cover that blends seamlessly into corporate spaces, effectively concealing equipment and maintaining a professional, uncluttered exterior. Hinged side panels with magnetic catches provide quick and easy access to installed equipment, while integrated keystone mounting points within the Credenza frame accommodate both standard snap-in keystones and panel-mount connectors.

Installer-Friendly Design with Thermal Management

An installer-friendly, easy-to-hang wall plate and open-frame construction provide additional flexibility during installation, with generous space for positioning wall-mounted power sockets and data points. The Credenza is designed to promote natural convection component cooling to maintain effective operating temperatures during normal use. Where additional thermal management is required, optional thermostatically controlled fans provide dynamic cooling to deliver optimal conditions.

The result is a versatile, discreet and future-ready AV solution that combines functionality, accessibility and a clean architectural aesthetic.

About Peerless-AV®
Driving Technology Through Innovation
For over 80 years, passion and innovation continue to drive Peerless-AV forward. We proudly design and manufacture the highest quality products, including outdoor displays and TVs, dvLED and LCD video wall systems, completely integrated kiosks, professional carts and stands, and more. Whether a full-scale global deployment or high volume custom project, Peerless-AV develops meaningful relationships and delivers world-class service. In partnership with Peerless-AV, you are trusting an award-winning team of experts who will support your business every step of the way. For more information, visit peerless-AV.com.
